VOLUME 17, 1992

CONTENTS

JANUARY

		page
EDITORIAL	Naming names, *Tim Hunt*	1
JOURNAL CLUB	Golgi localization signals, *Stella M. Hurtley*	2
	RNA editing: in chloroplast and brain, *Roberto Cattaneo*	4
OBITUARY	Remembering Ef: Efraim Racker	6
TALKING POINT	Closed circular DNA as a probe for protein-induced structural changes, *James H. White, Robert M. Gallo and William R. Bauer*	7
OPEN QUESTION	How does protein phosphorylation regulate photosynthesis? *John F. Allen*	12
	Is the multidrug transporter a flippase? *Christopher F. Higgins and Michael M. Gottesman*	18
REVIEWS	Transcribed chromatin, *Randall H. Morse*	23
	Selective membrane protein trafficking: vectorial flow and filter, *Colin R. Hopkins*	27
	Topography of glycosylation reactions in the endoplasmic reticulum, *Claudia Abeijon and Carlos B. Hirschberg*	32
	From ligand binding to gene expression: new insights into the regulation of G-protein-coupled receptors, *Sheila Collins, Marc G. Caron and Robert J. Lefkowitz*	37
	Metabolic control of gene expression: *in vivo* studies with transgenic mice, *Mary M. McGrane, Jeung S. Yun, Yashomati M. Patel and Richard W. Hanson*	40
LETTERS	A tablecloth-sized model *E. coli*, *Deborah K. Kaska and Robert V. Blystone*	22
	Close parallels in allergic diseases, *Peter Arnold*	22
	(Reply from Peter Barnes)	22
BOOK REVIEWS	Lymphokines and Interleukins *(by Maureen M. Dawson)*, *Patricia L. Kilian*	45
	Methods in Inositide Research *(edited by Robin F. Irvine)*, *Bob Michell*	45
	Biosynthesis and Biodegradation of Cellulose *(edited by C. H. Haigler and P. J. Weimer)*, *Roger C. Prince*	46
BOOKS IN BRIEF	Techniques in Protein Chemistry II *(edited by J. J. Villafranca)*	47
	DNA Replication, second edn *(by Arthur Kornberg and Tania A. Baker)*	47

FEBRUARY

JOURNAL CLUB	The latent tendencies of PAI-1, *Stephen R. Sprang*	49
	An ion channel-gated adenylyl cyclase, *Alfred Maelicke*	51
OBITUARY	Harland Goff Wood 1907–1991	52
GENERAL FEATURE	Federation of Asian and Oceanian Biochemists: where now after 20 years? *Jisnuson Svasti*	53
TALKING POINT	DNA polymerase ε: in search of a function, *Ulrich Hübscher and Pia Thömmes*	55
REVIEWS	Too much of a good thing: light can be bad for photosynthesis, *James Barber and Bertil Andersson*	61
	Phosphorylase: a biological transducer, *Michelle F. Browner and Robert J. Fletterick*	66
	LIF: lots of interesting functions, *Douglas J. Hilton*	72
	Apolipoprotein B mRNA editing: a new tier for the control of gene expression, *Peter Hodges and James Scott*	77
	Plant metabolism of xenobiotics, *Heinrich Sandermann, Jr*	82

LETTERS
Regulation of glucokinase and its role in liver metabolism, *Henri Gery Hers* 59
(Reply from Cornish-Bowden and Cárdenas) 59
Possible problems with the protein sequence comparison program FASTA, *Jonathan Reizer, Milton H. Saier and Aiala Reizer* 60

POEM
Gs, *Mark M. Rasenick* 71

BOOKS IN BRIEF
Biophysical and Biochemical Aspects of Fluoroscence Spectroscopy *(edited by T. G. Dewey)* 84
Conformations and Forces in Protein Folding *(edited by Barry T. Nall and Ken A. Dill)* 84

BOOK REVIEWS
Membrane Fusion *(edited by Jan Wilschut and Dick Hoekstra), Jack A. Lucy* 85
The Neuronal Cytoskeleton *(edited by R. D. Burgoyne), Martin J. Carden* 85

MARCH

JOURNAL CLUB
Trimeric G proteins in Golgi transport, *Robert D. Burgoyne* 87

TECHNIQUES
In vitro genetics, *Jack W. Szostak* 89

TALKING POINT
Chromatin condensation: does histone H1 dephosphorylation play a role? *Sharon Y. Roth and C. David Allis* 93

PROTEIN SEQUENCE MOTIFS
Is the erythrocyte protein p55 a membrane-bound guanylate kinase? *Mark G. Goebl* 99

REVIEWS
Engineered metalloregulation in enzymes, *Jeffrey N. Higaki, Robert J. Fletterick and Charles S. Craik* 100
Hydrolysis of phosphate monoesters: a biological problem with multiple chemical solutions, *John B. Vincent, Michael W. Crowder and B. A. Averill* 105
Fructose-bisphosphate aldolases: an evolutionary history, *James J. Marsh and Herbert G. Lebherz* 110
Dual-specificity protein kinases: will any hydroxyl do? *Richard A. Lindberg, Anne Marie Quinn and Tony Hunter* 114
Ribonucleotide reductase: regulation, regulation, regulation, *Stephen J. Elledge, Zheng Zhou and James B. Allen* 119

BOOK REVIEWS
Nuclear Hormone Receptors: Molecular Mechanisms, Cellular Functions and Clinical Abnormalities *(edited by Malcolm G. Parker), Jeffrey N. Miner* 124
Hormonal Control of Gene Transcription *(edited by Philip Cohen and Gordon Foulkes), Malcolm Parker* 125
Blood Cell Biochemistry, Vol. 1 Erythroid Cells; Vol. 2 Megakaryocytes, Platelets, Macrophages and Eosinophils; Vol. 3 Lymphocytes and Granulocytes, *(edited by J. R. Harris), A. H. Maddy* 125
Biology and Biochemistry of Nitrogen Fixation *(edited by M. J. Dilworth and A. R. Glenn), John Postgate, FRS* 126

BOOKS IN BRIEF
Laboratory Guide to Biochemistry, Enzymology and Protein Physical Chemistry: A Study of Aspartate Transcarbamylase *(by Marc le Maire, Raymond Chabaud and Guy Hervé)* 127
DNA Science. A First Course in Recombinant DNA Technology *(by David A. Micklos and Greg A. Freyer)* 127

APRIL

PROTEIN SEQUENCE MOTIFS
A module of the DnaJ heat shock proteins found in malaria parasites, *Peer Bork, Chris Sander, Alfonso Valencia and Bernd Bukau* 129

FEATURE
Proofreading, NTPases and translation: constraints on accurate biochemistry, *Michael Yarus* 130

REVIEWS
NF-κB and related proteins: Rel/dorsal homologies meet ankyrin-like repeats, *Volker Blank, Philippe Kourilsky and Alain Israël* 135
Molecular flypaper and atherosclerosis: structure of the macrophage scavenger receptor, *Monty Krieger* 141
Mammalian hormones in microbial cells, *John Lenard* 147
Herbicide binding in the bacterial photosynthetic reaction center, *Irmgard Sinning* 150
Clusterin: the intriguing guises of a widely expressed glycoprotein, *Dieter E. Jenne and Jürg Tschopp* 154
Structural and functional relationships between aminoacyl-tRNA synthetases, *Dino Moras* 159

BOOK REVIEWS	The Biological Chemistry of the Elements *(by J. J. R. Fraústo da Silva and R. J. P. Williams), Christopher Exley*	165
	Biological Molecules *(edited by C. A. Smith and E. J. Wood), Philip A. Evans*	165
	NMR and Biomolecular Structure *(edited by I. Bertini, H. Molinari and N. Niccolai), Peter Morris*	166
BOOKS IN BRIEF	Luminescence Techniques in Chemical and Biochemical Analysis *(edited by W. R. G. Baeyens, D. De Keukeleire and K. Korkidis)*	167
	Essays in Biochemistry *(edited by K. F. Tipton)*	167
	LIPSKY ACROSTIC	134
	BOOKS RECEIVED	167

MAY

JOURNAL CLUB	Structure of growth hormone and its receptor: an unexpected stoichiometry, *Pierre de Meyts*	169
FEATURE	Proofreading, NTPases and translation: successful increase in specificity, *Michael Yarus*	171
TEXTBOOK ERROR	Valine is a precursor of propionyl-CoA, *Pierre Kamoun*	175
REVIEWS	The varieties of ribonuclease P, *Sylvia C. Darr, James W. Brown and Norman R. Pace*	178
	Flavin-linked peroxide reductases: protein-sulfenic acids and the oxidative stress response, *Al Claiborne, R. Paul Ross and Derek Parsonage*	183
	Chromatin dynamics and the modulation of genetic activity, *Jeffrey C. Hansen and Juan Ausio*	187
	How antibodies block HIV infection: paths to an AIDS vaccine, *Scott Putney*	191
	Complex regulation of simple sugar transport in insulin-responsive cells, *Michael P. Czech, Brian M. Clancy, Anna Pessino, Chee-Wai Woon and Scott A. Harrison*	197
LETTERS	A bipartite nuclear targeting motif in protein kinase C? *A. N. Malviya and Christoph Block*	176
	Communication among the proteoglycans, *J. E. Scott, H. Greiling and A. Linker*	176
	Fresco–Alberts–Doty model, *Alexey A. Bogdanov*	177
BOOK REVIEW	PCR: A Practical Approach *(edited by M. J. McPherson, P. Quirk and G. R. Taylor), Soo Pickering*	201
	NOMENCLATURE MATTERS	177
	COMPETITION: Never a dull enzyme?	177
	BOOKS RECEIVED	201

JUNE

JOURNAL CLUB	Understanding liposomal properties to aid their clinical usage, *John L. Harwood*	203
	A transcription factor (?) joins the SH2 crowd, *Robert E. Steele*	205
OPEN QUESTION	Death and transfiguration among bacteria, *N. Patrick Higgins*	207
PROTEIN SEQUENCE MOTIFS	A family of DNA virus genes that consists of fused portions of unrelated cellular genes, *Eugene V. Koonin, Tatjana G. Senkevich and Victor I. Chernos*	213
REVIEWS	Glutamyl-transfer RNA: a precursor of heme and chlorophyll biosynthesis, *Dieter Jahn, Elizabeth Verkamp and Dieter Söll*	215
	Bacterial protein translocation: kinetic and thermodynamic role of ATP and the protonmotive force, *Arnold J. M. Driessen*	219
	Packaging and unpackaging the sea urchin sperm genome, *Dominic L. Poccia and G. R. Green*	223
	Cytotactin: a morphoregulatory molecule and a target for regulation by homeobox gene products, *Gerald M. Edelman and Frederick S. Jones*	228
	Mitogen-activated protein kinases: versatile transducers for cell signaling, *Steven L. Pelech and Jasbinder S. Sanghera*	233
LETTERS	Are molecular filters really necessary? *Gordon Koch*	211
	(Reply from Hopkins)	212

BOOKS IN BRIEF Understanding the Biochemistry of Respiration *(edited by D. C. James and G. S. Matthews), R. C.* 238
Dynamic Science: Biochemistry in Cambridge, 1898–1949 *(by Mark Weatherall and Harmke Kamminga)* 238

ELECTION OF FELLOWS 214

BOOKS RECEIVED 238

JULY

JOURNAL CLUB EBV's open sesame, *Bill Sugden* 239

TECHNIQUES Discovering peptide ligands using epitope libraries, *Jamie K. Scott* 241
Blotting and band-shifting: techniques for studying protein–protein interactions, *Daniel W. Carr and John D. Scott* 246

REVIEWS The *ets* gene family, *Kay Macleod, Dominique Leprince and Dominique Stehelin* 251
Native and non-native intermediates in the BPTI folding pathway, *David P. Goldenberg* 257
Evolutionary conservation of the active site of soluble inorganic pyrophosphatase, *Barry S. Cooperman, Alexander A. Baykov and Reijo Lahti* 262
Ribotoxin recognition of ribosomal RNA and a proposal for the mechanism of translocation, *Ira G. Wool, Anton Glück and Yaeta Endo* 266

LETTER Experimental determination of DNA helical repeats, *Jeffrey J. Hayes and Alan P. Wolffe* 250

BOOK REVIEWS Protein Architecture: A Practical Approach *(by A. M. Lesk), Greg Farber* 270
Introduction to Protein Structure *(by Carl Branden and John Tooze), Richard Perham* 270
DNA Replication, 2nd edn *(by Arthur Kornberg and Tania Baker), David Lilley* 271
Cell Biology of Extracellular Matrix, 2nd edn *(edited by Elizabeth D. Hay), Neil A. Hotchin* 272

BOOKS IN BRIEF Macromolecular Structures 1991: Atomic Structures of Biological Macromolecules *(edited by Wayne A. Hendrickson and Kurt Wüthrich), C. M. D.* 272

AUGUST

EDITORIAL 200 issues of *TIBS* 273

COMMENTARIES Inositol lipids in cellular signalling mechanisms, *Robert H. Michell* 274
The homeobox in perspective, *Walter J. Gehring* 277
The cell cycle then and now, *Marc Kirschner* 281
Hemopoietic regulators, *Donald Metcalf* 286
The molecular and biochemical basis of Duchenne muscular dystrophy, *MaryDilys S. Anderson and Louis M. Kunkel* 289
Protein engineering, *Alan Fersht and Greg Winter* 292
The emergence of the chaperone machines, *Costa Georgopoulos* 295
Microtubule motors: many new models off the assembly line, *Ronald D. Vale* 300

OBITUARY Peter Mitchell 1920–1992, *Peter C. Hinkle and Keith D. Garlid* 304
ACROSTIC 306
REVIEWS Biochemical mechanism of light adaptation in vertebrate photoreceptors, *Karl-Wilhelm Koch* 307
The retinoblastoma protein and the regulation of cell cycling, *David Cobrinik, Steven F. Dowdy, Philip W. Hinds, Sibylle Mittnacht and Robert A. Weinberg* 312
The 'ins' and 'outs' of mitochondrial membrane channels, *Carmen A. Mannella* 315

BOOK REVIEWS The Genetic Revolution *(edited by Bernard D. Davis), Gabby Dover* 320
The Making of a Fly: The Genetics of Animal Design *(by Peter Lawrence), Mary Bownes* 321
Transdifferentiation: Flexibility in Cell Differentiation *(by T. S. Okada), Norman Maclean* 322
Origins of Human Cancer: A Comprehensive Review *(edited by Joan Brugge, Tom Curran, Ed Harlow and Frank McCormick), Kari Alitalo* 322 322
Modern Microbial Genetics *(edited by Uldis N. Streips and Ronald E. Yasbin), Pete Gowland* 323
Intracellular Trafficking of Proteins *(edited by C. J. Steer and J. H. Hanover), Colin R. Hopkins* 324

BOOKS RECEIVED 324

SEPTEMBER

JOURNAL CLUB	Now you see it, now you don't: the Golgi disappearing act, *Stella M. Hurtley*	325
OBITUARY	Shosaku Numa 1927–1992, *Osamu Hayaishi*	327
TECHNIQUES	Does Fourier-transform infrared spectroscopy provide useful information on protein structures? *Parvez I. Haris and Dennis Chapman*	328
	Exploiting the chemical synthesis of RNA, *Nassim Usman and Robert Cedergren*	334
TALKING POINT	Oxygen and the connective tissues, *John E. Scott*	340
PROTEIN SEQUENCE MOTIFS	A novel zinc finger coiled-coil domain in a family of nuclear proteins, *Bramham A. Reddy, Laurence D. Etkin and Paul S. Freemont*	344
	A neurofilament-specific sequence motif, *Gerry Shaw*	345
REVIEWS	Vacuolar H^+-translocating pyrophosphatases: a new category of ion translocase, *Philip A. Rea, Yongcheol Kim, Vahe Sarafian, Ronald J. Poole, Julia M. Davies and Dale Sanders*	348
	Excavations into the active-site gorge of cholinesterases, *Hermona Soreq, Averell Gnatt, Yael Loewenstein and Lewis F. Neville*	353
	Cell membrane-associated mucins and their adhesion-modulating property, *John Hilkens, Marjolÿn J. L. Ligtenberg, Hans L. Vos and Sergey V. Litvinov*	359
LETTERS	Protein phosphorylation and LHCII structure, *K. Gopal Krishna, T. K. Suresh Kumar and M. W. Pandit*	346
	(Reply from Allen)	346
	Nuclear targeting sequences, *Errol C. Friedberg*	347
BOOK REVIEWS	Crystallization of Nucleic Acids and Proteins *(edited by A. Ducruix and R. Giegé)*, *David Rice*	364
	Recombinant DNA, 2nd edn *(edited by J. D. Watson, M. Gilman, J. Witkowski and M. Zoller)*, *Richard Walmsley*	364
	CORRIGENDUM	339
	ERRATUM	343

OCTOBER

INTRODUCTION	Signal transduction: crosstalk, *Yasutomi Nishizuka*	367
Signalling at the plasma membrane	Receptor classes and the transmitter-gated ion channels, *Eric A. Barnard*	368
	Triggering signaling cascades by receptor tyrosine kinases, *Michael J. Pazin and Lewis T. Williams*	374
	Common subunits of cytokine receptors and the functional redundancy of cytokines, *Atsushi Miyajima, Takahiko Hara and Toshio Kitamura*	378
Second messenger generation and destruction	G proteins, *John R. Hepler and Alfred G. Gilman*	383
	Signal transduction crosstalk in the endocrine system: pancreatic β-cells and the glucose competence concept, *George G. Holz and Joel F. Habener*	388
	Crosstalk among multiple signal-activated phospholipases, *Mordechai Liscovitch*	393
	Nitric oxide as a signal in blood vessels, *Richard G. Knowles and Salvador Moncada*	399
	Calcium and inositol 1,4,5-trisphosphate receptors: a complex relationship, *Colin W. Taylor and Ian C. B. Marshall*	403
Protein kinases and phosphatases	Signal integration at the level of protein kinases, protein phosphatases and their substrates, *Philip Cohen*	408
	Protein kinase C, calcium and phospholipid degradation, *Yoshinori Asaoka, Shun-ichi Nakamura, Kimihisa Yoshida and Yasutomi Nishizuka*	414
Signalling within the nucleus	Control of transcription factors by signal transduction pathways: the beginning of the end, *Michael Karin and Tod Smeal*	418
	The serum response element, *Richard Treisman*	423
	Multiplicity generates diversity in the retinoic acid signalling pathways, *Mark Leid, Philippe Kastner and Pierre Chambon*	427
Biological systems exhibiting transduction crosstalk	Signal transduction through the T-cell antigen receptor, *Robert T. Abraham, Larry M. Karnitz, J. Paul Secrist and Paul J. Leibson*	434
	Signal transduction and the actin cytoskeleton: the roles of MARCKS and profilin, *Alan Aderem*	438

NOVEMBER

JOURNAL CLUB	Channel your energies, *Judit Ovádi and Paul A. Srere*	445
TECHNIQUES	Selective placement of electron spin resonance spin labels: new structural methods for peptides and proteins, *Glenn L. Millhauser*	448
TALKING POINT	Protein sorting in mitochondria, *Benjamin S. Glick, Ellen M. Beasley and Gottfried Schatz*	453
	Does hydrophobic hydration destabilize protein native structures? *Norbert Muller*	459
	The ATP-dependent glutathione S-conjugate export pump, *Toshihisa Ishikawa*	463
PROTEIN SEQUENCE MOTIFS	The human protooncogene *ret*: a communicative cadherin? *Rainer Schneider*	468
REVIEWS	How to make a glycoinositol phospholipid anchor, *Alan M. Tartakoff and Neena Singh*	470
	Signal peptidases in prokaryotes and eukaryotes – a new protease family, *Ross E. Dalbey and Gunnar von Heijne*	474
BOOK REVIEWS	Gene Regulation: Biology of Antisense RNA and DNA *(edited by R. P. Erickson and Jonathan G. Izant), Richard Hogrefe*	478
BOOKS IN BRIEF	Microcomputers in Biochemistry *(edited by C. F. A. Bryce), Enzyme Assays (edited by R. Eisenthal and M. J. Danson), J. M.*	479

DECEMBER

OPEN QUESTION	Enter a new post-translational modification: D-amino acids in gene-encoded peptides, *Amram Mor, Mohamed Amiche and Pierre Nicolas*	481
TALKING POINT	Did the ancestral globin gene of plants and animals contain only two introns? *Brian Dixon and Bill Pohajdak*	486
	Evolution by acquisition: the case for horizontal gene transfers, *Michael W. Smith, Da-Fei Feng and Russell F. Doolittle*	489
PROTEIN SEQUENCE MOTIFS	Similarities in amino acid sequences of *Aplysia* ADP-ribosyl cyclase and human lymphocyte antigen CD38, *David J. States, Timothy F. Walseth and Hon Cheung Lee*	495
	A new group of putative RNA helicases, *Eugene V. Koonin*	495
REVIEWS	14-3-3 proteins: a highly conserved, widespread family of eukaryotic proteins, *Alastair Aitken, D. B. Collinge, B. P. H. van Heusden, T. Isobe, P. H. Roseboom, G. Rosenfeld and J. Soll*	498
	Regulation of phospholipase C by G proteins, *Paul C. Sternweis and Alan V. Smrcka*	502
	Regulation of sugar utilization by *Saccharomyces cerevisiae*, *K-D. Entian and J. A. Barnett*	506
BOOK REVIEWS	Receptor–Ligand Interactions: A Practical Approach *(edited by E. C. Hulme), Anthony Davenport and Peter Molenaar*	510
	Culture of Epithelial Cells *(edited by R. I. Freshney), Udo Schumacher*	511
	DULL ENZYME COMPETITION: RESULTS	494
	ERRATUM	493
	AUTHOR INDEX	513
	SUBJECT INDEX	517
	BOOKS REVIEWED	521
